CHAMELEON

FOR OUR SMARTER WORLD
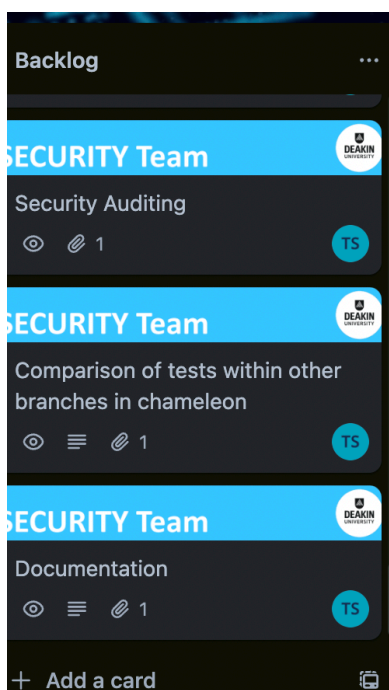

Trello Board Guide/Overview

# Link to the Trello Board: https://trello.com/b/XHXDxuS2/chameleon-security

If you need access please reach out to a leader to invite you.
Below is what the home page of the Trello Board looks like.
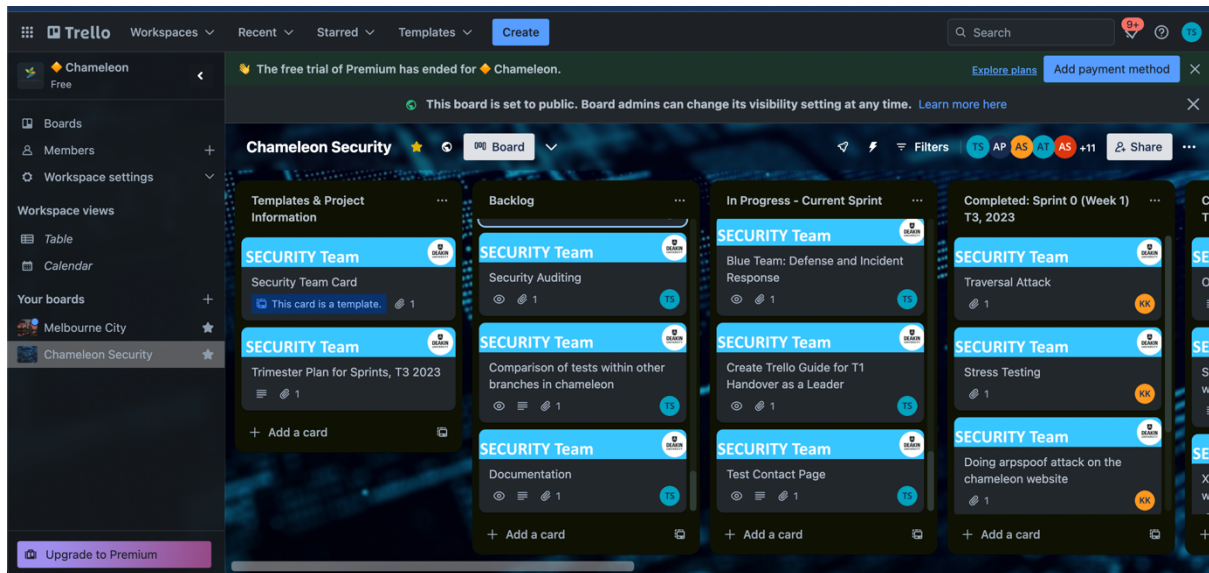

Backlog is the column for tasks that set to be completed and are welcome for anyone to pick up, if not already assigned to someone already
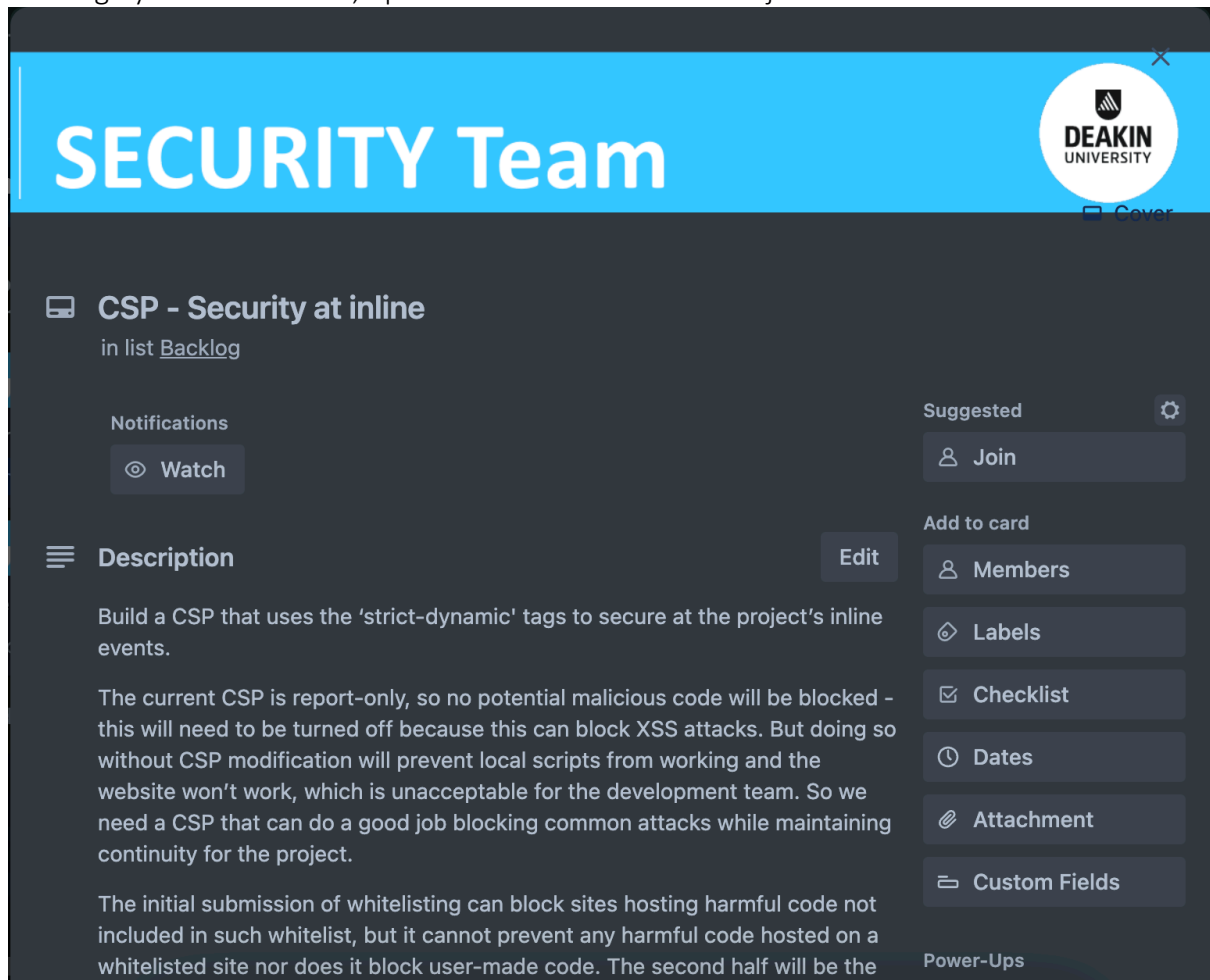

The in-progress tab is for items that are being worked on. Please move items you're working on to this column to notify to team members that the task is being actively worked on.
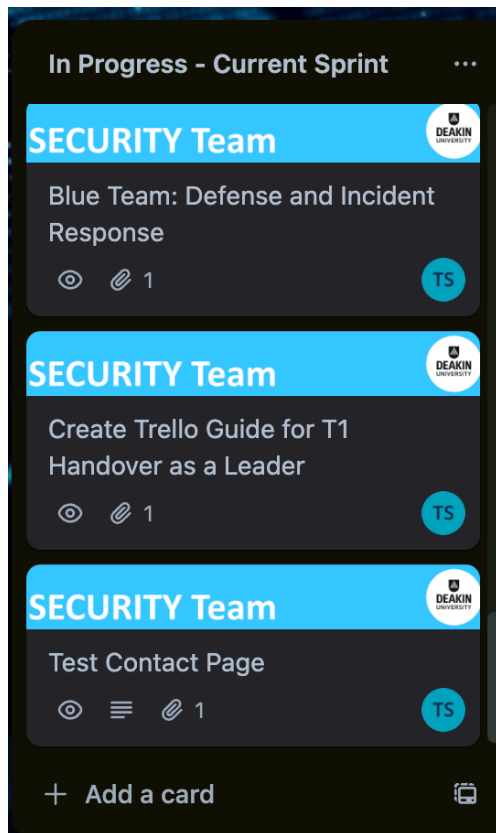

Please move completed items to the week that you've completed it in
To assign yourself to a task, open the Trello card and click "join".

Creating tasks:

If all tasks are assigned or your desired task is not there, you're more than welcome to create your own and assign it to yourself to work on.

Right click on the generic Trello card on the left which will allow you to create your own card. Assign it yourself and move it to the backlog or in progress.
